

Academic Program Description

University Name: University Of Anbar
Faculty/Institute: Education College for Women
Scientific Department: ... Department of Biology
Academic or Professional Program Name: Bachelor of Biology
Final Certificate Name: Bachelor of Biology
Academic System: ... Semester
Description Preparation Date: 16-9-2024
File Completion Date: 16-9-2024

Signature:

Head of Department Name:

Dr. Nedhal Ibrahim Lateff

Date: 16/9/2024

Signature:

Scientific Associate Name:

Dr. Omar Hazem Ismail

Date: 16/9/2024

The file is checked by:

Department of Quality Assurance and University Performance

Director of the Quality Assurance and University Performance

Department: Prof. Dr. Ahmed Abd El -Sattar

Date: 16/9/2024

Signature:

Approval of the Dean

أ.د. عصاة أحمد الجبار
العميد

Academic Program Description 2025

1. Program Vision

Leadership in higher education and scientific research, and the development of the academic program to achieve sustainable community development. The College of Education for Women seeks to prepare graduates in the field of education to work in government institutions and benefit from specialization in both scientific and applied fields.

2. Program message

Excellence in the quality of higher education and scientific research by adopting analytical and critical thinking strategies to develop human resources cognitively, intellectually, and skillfully in a competitive and creative environment. We work to prepare pioneering scientific and leadership competencies in the field of education and to develop the knowledge base in scientific research across various disciplines to serve the local, regional, and international community. We also train and refine students' minds scientifically and intellectually, emphasize social and cultural values, and respond to the requirements of the local market through the following:

-1 Community Service: By strengthening relationships with state institutions that benefit from our department's scientific specializations, we present applied research and hold scientific seminars and workshops inside and outside the department.

2 -Scientific Research: Scientific research is active in the department through the participation of faculty members and undergraduate and graduate students in conducting research in various disciplines and publishing research findings to contribute to community development in scientific fields and raise the global ranking of our college in particular and our university in general.

-3 The Educational Process: Providing a good educational and pedagogical environment for students and supporting and assisting them. In their field of study, arming them with knowledge and science, raising their intellectual level and scientific abilities, and allowing them to bear responsibility.

3. Program objectives

- 1 . Raising the level of scientific knowledge by developing the infrastructure at the educational and research levels and excelling in the teaching and learning strategy across all academic programs.
2. Developing academic programs, updating their outcomes, and promoting a culture of sustainable learning, which contributes to enhancing students' personal, social, academic, and professional capabilities and skills, with the goal of improving the standard of living for society and achieving sustainable development goals.
3. Fulfilling the requirements of social responsibility and achieving an influential presence in community events and activities as a path to social, cultural, scientific, and economic progress.
4. Adopting the highest standards of evaluation in the institutional and programmatic fields, with the goal of achieving comprehensive quality management requirements and improving the university's position in local and academic rankings.
5. Creating an environment for constructive and productive competition in the field of innovation and scientific research, and enhancing the output of applied research that addresses societal problems.
6. Preparing graduates with advanced theoretical and practical skills in the field of life sciences to keep pace with scientific developments and serve society.
7. Providing graduates with applied and practical scientific skills and the use of modern teaching methods.
8. Preparing graduates with a high level of proficiency in the field of life sciences to meet the needs of society and contribute to the development of a distinguished generation.

4. Program accreditation

nothing

5. Other external influences

nothing

6. Program structure				
Notes*	Percentage	Unit	Number of courses	Program structure

8. Expected Learning Outcomes of the Program	
Knowledge	
	<ul style="list-style-type: none"> • To possess broad and detailed knowledge in the fields of medicine, health, agriculture, food industries, and the natural and ecological systems. • To have extensive understanding of biological, genetic, and life science concepts and principles. • To be capable of accurate analysis, differentiation, and diagnosis in laboratory-based biological field
Skills	
	<ul style="list-style-type: none"> • Ability to comprehend life sciences and apply them practically. • Ability to manage crises and problems and propose appropriate solutions. • Ability to build a solid scientific foundation in the field of life sciences.
Values	

	<ul style="list-style-type: none"> Developing students' abilities to share scientific and practical ideas and skills.
--	--

9. Teaching and Learning Strategies

Detailed explanation of the scientific material.

Developing the ability to utilize the Internet to research certain topics covered in the scientific material.

Using educational videos, illustrative images, and digital files as alternatives to printed textbooks.

10. Assessment Methods

- **Daily quizzes**
- **Various assignments**
- **Midterm exams**
- **Questions and discussions**

11. Faculty members

Faculty members						
Faculty Preparation		Special Requirements/Skills (if any)		Specialization		Academic Rank
Lecturer	Permanent Member			specific	General	
	3				Biology	Professor
	11				Biology	Assistant Professor
	11				Biology	Lecturer
	19				Biology	Assistant Lecturer
	3				Biology	Researcher

Professional Development

Orientation of New Faculty Members

Holding periodic meetings for new faculty members and conducting workshops and development courses

Professional Development for Faculty Members

12.Admission Criteria

The department's admission system is (central, parallel, evening) admission.

13.The most important sources of information about the program

14.Program Development Plan

Using new concepts in the field of life sciences and utilizing electronic devices and the Internet to develop and deliver scientific material to students.

Course Description

1. Course Name:	
Analytical chemistry	
2. Course Code:	
EWb3105	
3. Semester / Year:	
First course ٢٠٢٥/٢٠٢٤	
4. Description Preparation Date:	
2024/12/1	
5. Available Attendance Forms:	
Weekly	
6. Number of Credit Hours (Total) / Number of Units (Total)	
3/4	
7. Course administrator's name (mention all, if more than one name)	
Name: Atheer obaid talak Email: atheer_obaid@uoanbar.edu.iq	
8. Course Objectives	
Course Objectives	<ul style="list-style-type: none"> • Knowing the types of analysis and the methods used for each type and calculating the proportions of the analyzed materials • Knowledge of chemical equilibrium and its relationship to chemical analysis • Knowing the types of precipitates and precipitates chemical analysis
9. Teaching and Learning Strategies	
Strategy	The lecture is explained and clarified by presenting it to the students on the screen and re-clarifying it practically after which the student is tested through daily exams.

10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	4	Definition of analytical chemistry, its types and the tools used in the analysis process	Analytical chemistry	A theoretical and practical lecture	Daily exams and daily assignments
Second	ξ	Types of precipitates and precipitants, the quantity of obtaining them, and preparing these precipitants	=	=	=
Third	ξ	Molarity, standard, normality, and methods for preparing liquid and solid compounds from it	=	=	=
Fourth	ξ	How to calculate percentages in sediments	=	=	=
Fifth	ξ	Characteristics of sediments and precipitates	=	=	=
Sixth	ξ	Chemical equilibrium	=	=	=
Seventh	ξ	Acids and bases	=	Practical and theoretical exam	=
Eighth	γ	First month exam	=	Practical and theoretical exam	=
Ninth	ξ	Ionization of strong acids and strong bases	=	=	=
Tenth	ξ	Ionization of weak bases and weak acids	=	=	=
Eleventh	ξ	Ionization of strong salts and weak salts	=	=	=
Twelfth	ξ	Ionization of water	=	=	=
Thirteenth	ξ	Structured solution	=	=	=
	ξ	Ionization of a buffer solution of a weak base	=	=	=
			=	=	=

Fourteenth	ξ	Second month exam	=	=	=
Fifteenth	γ			Practical and theoretical exam	=

11. Course Evaluation

The grade is distributed out of 100 according to the theoretical exams: 20 marks, the practical exams: 10 marks, the daily exams: 5 marks, and the daily assignments: 5 marks. The final exam is 60 marks, divided into 15 practical marks and 40 theoretical marks.

12. Learning and Teaching Resources

Required textbooks (curricular books, if any)	
Main references (source)	General analytical chemistry bo
Recommended books and references (scientific journals, reports...)	
Electronic references, websites.	

Course Description

11. Course Evaluation

The grade is distributed out of 100 according to the theoretical exams: 20 marks, the practical exams: 10 marks, the daily exams: 5 marks, and the daily assignments: 5 marks.

The final exam is 60 marks, divided into 15 practical marks and 40 theoretical marks.

12. Learning and Teaching Resources

Required textbooks (curricular books, if any)	
Main references (source)	General basics of organic chemistry book
Recommended books and references (scientific journals, reports...)	
Electronic references, websites.	

Course Description

1. Course Name:					
Biology 2					
2. Course Code:					
EWb3104					
3. Semester / Year:					
Season/ First					
4. Description Preparation Date:					
1-12-2024					
5. Available Attendance Forms:					
Weekly					
6. Number of Credit Hours (Total) / Number of Units (Total)					
2 theoretical hours + 2 practical hours = (4hours) per week Number of units (3)					
7. Course administrator's name (mention all, if more than one name)					
Name: Lecturer Dr. Ali Hussein Ibraheem Al-Bayati					
Email: ag.alihussein@uoanbar.edu.iq					
Name: Lecturer Asmaa Abdulameer Bedan					
Email: asmaa.abdulameer@uoanbar.edu.iq					
8. Course Objectives					
Course Objectives		This course aims to enable the biologist sciences student to master the general basics of botany, and includes a historical introduction. The branches of science, its scope, and its importance. It also mainly deals with the study of the apparent appearance and internal structure of the plant, the most important biological processes that occur in the plant, and the plant's relationship with humans and the environment.			
9. Teaching and Learning Strategies					
Strategy		Through theoretical lectures and the laboratory aspect of training in the field of botany and determining the characteristics of its parts morphologically and anatomically using clarification methods and daily examinations, as well as discussing quarterly reports.			
10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	2Theoretic 2practical	Knowledge	Introduction, and getting acquainted with the basic terms in the field of botany.	Use the whiteboard and display screen	Daily exam and oral questions
2	2Theoretic 2practical	Knowledge	Learn about the history of the development of botany and the contribution of Arab and Muslim scientists in the	Use the whiteboard and display screen	Daily exam and oral questions

			progress of science, its fields and branches and its importance.		
3	2Theoretical 2practical	Knowledge	Plant tissue Meristematic plant tissue. Permanent plant tissues. Basic plant tissues. Plant connective tissue. Vascular plant tissue. Secretory plant tissue	Use the whiteboard and display screen	Daily exam and oral questions
4	2Theoretical 2practical	Knowledge	Learn about the composition of the plant cell and interpretation of basic biological processes in plants and linking basic concepts in botany and plant chemistry	Use the whiteboard and display screen	Daily exam and oral questions
5	2Theoretical 2practical	Knowledge	Root phenotypic structure. Types of roots - and the anatomical structure of the roots - natural secondary growth and types of modifications in the apparent and anatomical structure of the roots to adapt to the environment.	Use the whiteboard and display screen	Daily exam and oral questions
6	2Theoretical 2practical		First month exam

12	2Theoretic 2practical		Second month exam		
13	2Theoretic 2practical	Knowledge	Anatomy of leaves	Use the whiteboard and display screen	Daily exam and oral questions
14	2Theoretic 2practical	Knowledge	The basic biological processes in plants (photosynthesis and respiration) and their relationship to the environment	Use the whiteboard and display screen	Daily exam and oral questions
15	2Theoretic 2practical	Knowledge	The relationship between plants, humans, medicinal and economic plants	Use the whiteboard and display screen	Daily exam and oral questions

11.Course Evaluation

Monthly exams 25 marks
Daily preparation, daily exams and reports 5 marks
Practical exam: 10 marks
Strive 40 degrees
Final exam (45 marks for theoretical exam + 15 marks for practical exam) = 60 marks
Quest with final = 100 marks

12.Learning and Teaching Resources

Required textbooks (curricular books, if any)	Basic of plant science
Main references (source)	Basics of Botany - Ruqaya Hussein Jassim - 2011 Dar That Al Salasil for Printing and Publishing
Recommended books and references (scientific journals, reports...)	Principles of Plant Science: Environmental factors and technology in growing plants. by Dennis R. Decoteau (Author)2005.

Course Description

1. Course Name: plant anatomy 1/ First course / First stage					
2. Course Code:					
3. Semester / Year: Semester /2024-2025					
4. Description Preparation Date: 1/12/2024					
5. Available Attendance Forms: Presence					
6. Number of Credit Hours (Total) / 2 Hours practical + 2 Hours theoretical					
7. Course administrator's name (mention all, if more than one name)					
Name: Dr. Haifa Hameed Rasheed / Email: haifaa.hameed@uoanbar.edu.iq					
Name: Dr. Marwa Ismail Habib /Email: Marwahab22@uoanbar.edu.iq					
8. Course Objectives					
Course Objectives		Introduce the student in detail about the meaning of plant anatomy. Introduce the student to the different parts of the plant anatomically.			
9. Teaching and Learning Strategies					
Strategy		Through theoretical lectures and the laboratory aspect of training in the field of botany and determining the characteristics of its parts morphologically and anatomically using clarification methods and daily examinations, as well as discussing quarterly reports.			
10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
١	٤	Student knowledge of the principles of plant anatomy	Define plant anatomy	Explanation - model presentation slides - and lecture	Theoretical Practical tests Reports
٢	٤	Learn about the parts of the plant and the branches of anatomy	A comprehensive introduction to plant anatomy and its branches	Explanation - model presentation slides - and lecture	Theoretical Practical tests Reports
٣	٤	Student knowledge of the description of the plant cell and its most	Study of the living components of a plant cell	Explanation - model presentation slides - and lecture	Theoretical Practical tests Reports

		important living components				
ε	ε	Student knowledge of the description of the plant cell and its most important living components	Study of the non-living components of plant parts	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports	
ο	ε	Identify the types of walls in plant cells and know the components of the wall.	plant cell wall	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports	
Ϛ	ε	Knowledge of pits types	Study of types of pits	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports	
7	Monthly Examination					
⋈	ε	A cognitive description of the most important theories that explain the cell wall	A study of the most important theories that explain the formation of the cell wall	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports	
ϑ	ε	Teaching the student how the plant classification process is carried out and what are the approved principles	Study of the bases adopted in the classification of plant tissues	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports	
Ϛ	4	Student knowledge of plant tissues, including collenchyma tissues	Study of the collenchyma tissue	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports	
ϛ	ε	Student knowledge of plant tissues, including parenchyma tissues	Study of the parenchymal tissue	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports	
Ϝ	ε	Student knowledge of plant tissues, including sclerenchyma tissues	Study of the sclerenchyma tissue	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports	
ϝ	ε	Student knowledge of the function of xylem and phloem tissue and knowledge of the anatomical structure of these tissues	The study of xylem and phloem texture	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports	
Ϟ	ε	Student knowledge of the function of xylem and phloem tissue and knowledge of the	The study of xylem and phloem texture	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports	

	anatomical structure of these tissues			
١٥	Monthly Examination			
11. Course Evaluation				
The grade is distributed out of 100 based on the tasks assigned to the student, such as daily preparation, daily, oral, monthly and written exams, reports, etc.				
12. Learning and Teaching Resources				
Required textbooks (curricular books, if any)		Fundamentals of plant anatomy Dr. Badri Owaid Al-Ani - University of Baghdad		
Main references (source)		Fundamentals of plant physiology Doctor Ahmed Mostafa Elhayani.		
Recommended books and references (scientific journals, reports...)		Practical part in plant anatomy Practical plant anatomy		
Electronic references, websites.		Use of electronic references, websites		

Course Description

1. Course Name: plant anatomy ١ / second course / First stage					
2. Course Code:					
3. Semester / Year: Semester /2024-2025					
4. Description Preparation Date: 1/12/2024					
5. Available Attendance Forms: Presence					
6. Number of Credit Hours (Total) / 2 Hours theoretical					
7. Course administrator's name (mention all, if more than one name)					
Name: Dr. Haifa Hameed Rasheed / Email: haifaa.hameed@uoanbar.edu.iq					
Name: Dr. Marwa Ismail Habib /Email: Marwahab22@uoanbar.edu.iq					
8. Course Objectives					
Course Objectives		This course aims to study the internal structure of the plant by studying the anatomical sections of its various parts, studying the anatomical structure of the plant cell, the different types of tissues, and the anatomical structure of plant organs, in addition to knowing the effect of the environment on the anatomical structure of the plant.			
9. Teaching and Learning Strategies					
Strategy		<ol style="list-style-type: none"> 1. Thinking and discussion methods. 2. Practical tests used in laboratories. 3. Teaching through exploratory lectures. 4. Acquire teamwork skills. 5. Benefit from computer, internet, and periodical skills. 			
10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
١	2	Teaching the student the anatomical structure of the plant and its function	Internal structure of the plant Internal structure of the root	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports
٢	2	Introducing the student to the anatomy of the root zone and knowing the parts of the root	Internal structure of the root	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports
٣	2	Introducing the student to the anatomy of the root zone and knowing the parts of the root	Internal structure of the root	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports

٤	2	Introducing the student to the anatomy of the leg area and knowing the anatomical parts of the stem	Internal structure of the stem	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports
٥	2	Introducing the student to the anatomy of the stem region and the difference between the stem of monocotyledonous and dicotyledonous plants.	Internal structure of the stem	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports
٦	2	Teaching the student the anatomy of the leaf and knowing the layers of the leaf and its internal parts	Internal structure of the leaf	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports
7	Monthly Examination				
٨	2	Student knowledge of the diagonal expansion of monocotyledonous and dicotyledonous plants	Secondary thickening Vascular cambium	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports
٩	2	Study of the principles adopted in classifying plant tissues	secondary xylum	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports
١٠	2	Study of the principles adopted in classifying plant tissues	Secondary phloem	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports
١١	2	Study of the principles adopted in classifying plant tissues	surrounding epiderm	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports
١٢	2	Teaching the student how diagonal expansion occurs in stems and roots.	Secondary thickening of stems and roots	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports
١٣	2	Teaching the student about the relationship between the plant and the environment in causing anatomical changes	Secondary structure of plants and its relationship to the environment	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports
١٤	2	Student knowledge of the importance of aquatic plants and their lifestyle	Aquatic plants	Explanation - model presentation slides - and lecture	Theoretical Tests Practical tests Reports
١٥	Monthly Examination				

11. Course Evaluation

The grade is distributed out of 100 based on the tasks assigned to the student, such as daily preparation, daily, oral, monthly and written exams, reports, etc.

12. Learning and Teaching Resources

Required textbooks (curricular books, if any)

Fundamentals of plant anatomy
Dr. Badri Owaid Al-Ani - University of Baghdad

Main references (source)	Fundamentals of plant physiology Doctor Ahmed Mostafa Elhayani.
Recommended books and references (scientific journals, reports...)	Practical part in plant anatomy Practical plant anatomy

General Arabic	
2. Course Code:	
Ewb 1102	
3. Semester / Year:	
2024 / 2025	
4. Description Preparation Date:	
2024 /12 / 1	
5. Available Attendance Forms:	
Classroom	
6. Number of Credit Hours (Total) / Number of Units (Total)	
Number of Credit Hours : 2 Number of Units : 2	
7. Course administrator's name (mention all, if more than one name)	
Name: Assist lect. Inas Hameed Nida Email: inas.hameed@uoanbar.edu.iq	
8. Course Objectives	
Course Objectives	<ol style="list-style-type: none">1.Students should know the origins of drawing Arabic letters in terms of their depiction of the spoken word.2.Correct common spelling mistakes and the use of punctuation marks.3.Apply simple grammar rules in academic writing.4.Knowledge of eloquent speech that affects the souls of readers, whether poetry or prose .5.Acquire a language culture that qualifies him for oral and written communication in learning environment.
9. Teaching and Learning Strategies	
Strategy	<ol style="list-style-type: none">1.Direct explanation with real-life examples related to education contexts.2.Short class activities based on phrase correction, sentence parsing and spelling .3.Gradual training of sound writing in terms of form and meaning.4.Brainstorming when reading and analyzing educational texts.5.Active learning activities such as: completing sentences – correcting texts-rewriting a paragraph.
10. Course Structure	

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
Week 1	2	The ability to use the classical Arabic language properly in educational and academic contexts, by writing functional texts free of linguistic errors, employing spelling and punctuation rules correctly, while developing reading comprehension skills and written and oral expression to qualify him to communicate with the learning environment	Speech section / noun, verb and letter	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports
Week 2	2	The ability to use the classical Arabic language properly in educational and academic contexts, by writing functional texts free of linguistic errors, employing spelling and punctuation rules correctly, while developing reading comprehension skills and written and oral expression to qualify him to communicate with the learning environment	Rules for writing a syllable	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports
Week 3	2	The ability to use the classical Arabic language properly in educational and academic contexts, by writing functional texts free of linguistic errors, employing spelling and punctuation rules correctly, while developing reading comprehension skills	Rules of the numerical participle	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports

		and written and oral expression to qualify him to communicate with the learning environment			
Week 4	2	The ability to use the classical Arabic language properly in educational and academic contexts, by writing functional texts free of linguistic errors, employing spelling and punctuation rules correctly, while developing reading comprehension skills and written and oral expression to qualify him to communicate with the learning environment	Texts of pre-Islamic poetry My poem Jamil Buthaina and Kaab bin Zuhair	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports
Week 5	2	The ability to use the classical Arabic language properly in educational and academic contexts, by writing functional texts free of linguistic errors, employing spelling and punctuation rules correctly, while developing reading comprehension skills and written and oral expression to qualify him to communicate with the learning environment	Debutants and news	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports
Week 6	2	The ability to use the classical Arabic language properly in educational and academic contexts, by writing functional texts free of linguistic errors, employing spelling and punctuation rules	Signs of original and subordinate expressions in nouns and verbs	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports

		correctly, while developing reading comprehension skills and written and oral expression to qualify him to communicate with the learning environment			
Week 7	2	The ability to use the classical Arabic language properly in educational and academic contexts, by writing functional texts free of linguistic errors, employing spelling and punctuation rules correctly, while developing reading comprehension skills and written and oral expression to qualify him to communicate with the learning environment	Punctuation marks	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports
Week 8	2	The ability to use the classical Arabic language properly in educational and academic contexts, by writing functional texts free of linguistic errors, employing spelling and punctuation rules correctly, while developing reading comprehension skills and written and oral expression to qualify him to communicate with the learning environment	Text from the Holy Quran (Surat al-Hijrat)	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports
Week 9	2	The ability to use the classical Arabic language properly in educational and academic contexts, by writing functional texts free of linguistic	Imperfect verbs	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports

		errors, employing spelling and punctuation rules correctly, while developing reading comprehension skills and written and oral expression to qualify him to communicate with the learning environment			
Week 10	2	The ability to use the classical Arabic language properly in educational and academic contexts, by writing functional texts free of linguistic errors, employing spelling and punctuation rules correctly, while developing reading comprehension skills and written and oral expression to qualify him to communicate with the learning environment	Texts from Arabic prose	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports
Week 11	2	The ability to use the classical Arabic language properly in educational and academic contexts, by writing functional texts free of linguistic errors, employing spelling and punctuation rules correctly, while developing reading comprehension skills and written and oral expression to qualify him to communicate with the learning environment	Solar and lunar letters	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports

8. Course Objectives					
Course Objectives		<ul style="list-style-type: none"> Training students in creative reading. Mastering language skills, mastering writing, and developing a cognitive vocabulary store. The ability to use multiple types of reading, understand written materials. Ability to distinguish between concepts, and analyze text to divide information into parts. Forming a coherent cognitive text that expresses information in a specific field. 			
9. Teaching and Learning Strategies					
Strategy		Modern lecture, group work, and using technology tool.			
10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or Subject Name	Learning Method	Evaluation Method
1	2	To be able to welcome people	Hello.		
2	2	To be able to ask about people	Your World.		
3	2	To be able to introduce oneself.	All About You.		
4	2	To be able to introduce family and friends and ask	Family and Friend		

		questions about friends.			
5	2	To identify vocabulary about our life.	The Way Live		
6	2	To identify daily vocabulary.	Every Day.		
7	2		Mid-Term Exam		
8	2	To speak about Favourites	My Favourites.		
9	2	To ask personal information.	Where I live.		
10	2	To form past tense sentences.	Times Past.		
11	2	To speak about our daily time.	We had Great time		
12	2	To express our abilities and the verbs related to them.	I can Do It!		
13	2	To use language functions.	Please and Thank		
14	2	To use daily expressions.	Here and Now		
15	2	To express about future plans.	It's Time to Go!		

11. Course Evaluation

The evaluation process consisted of 2 mid-term exams allotted 40 marks, and summative exam allotted 60 marks.

12. Learning and Teaching Resources

Required textbooks (curricular books, if any)	Headway Beginner
Main references (source)	
Recommended books and references (scientific journals, reports...)	
Electronic references, websites.	

Course Description

1. Course Name:	
Biochemistry	
2. Course Code:	
EWB3207	
3. Semester / Year:	
Second course ٢٠٢٥/٢٠٢٤	
4. Description Preparation Date:	
2024/3/29	
5. Available Attendance Forms:	
weekly	
6. Number of Credit Hours (Total) / Number of Units (Total)	
3/4	
7. Course administrator's name (mention all, if more than one name)	
Name: Atheer obaid talak Email: atheer_obaid@uoanbar.edu.iq	
8. Course Objectives	
Course Objectives	<ul style="list-style-type: none">• Knowledge of fats and their chemical composition• Knowledge of amino acids and their role in the formation of important proteins in the organism of living organisms• Knowing the names and types of fatty compounds
9. Teaching and Learning Strategies	
Strategy	The lecture is explained and clarified by presenting it to the students on the screen and re-clarifying it practically after which the student is tested through daily exams.

10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	4	Definition and nature of fats	Biochemistry	A theoretical and practical lecture	Daily exams and daily assignments
Second	ξ	Fatty acids	=	=	=
Third	ξ	Naming fatty acids	=	=	=
Fourth	ξ	Polar and non-polar amino acids	=	=	=
Fifth	ξ	The cyclic structure of sugars	=	=	=

Course Description

1. Course Name:

Animal Histology 1

2. Course Code:

EWb4305

3. Semester / Year:

Semester (2024-2025)

4. Description Preparation Date: 1/12/2024

5. Available Attendance Forms:

Weekly

6. Number of Credit Hours (Total) / Number of Units (Total)

2 theoretical hours + 2 practical hours = (4 hours) per week
Number of units (3)

7. Course administrator's name (mention all, if more than one name)

Name: Shymaa Hajlan Sayer & Nbaa Mutea Abid AL-Alh

Email: Edw.Shmaah.s@uoanbar.edu.iq
naba.mutia@uoanbar.edu.iq

8. Course Objectives

- Knowing the types of animal tissues and the distinctive characteristics of each tissue
- Identify the most important specializations of the cells of the human or animal body
- Identify the most important functions of tissues and their locations

9. Teaching and Learning Strategies

Strategy

- Presenting the lecture through a meeting using the Whitboard or projector (data show)- dialogue - group discussion - investigation and exploration - problem

solving - scientific research - practical application in the laboratory - brainstorming.

10. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	4	Typical explanation of slides and lecture	Histological section of simple & stratified epithelial tissues	Knowledge and understanding Ability to analyze Developing teaching skill Practical application Skill	Theoretical tests Practical tests Reports
2	4	Typical explanation of slides and lecture	Histological section of glands	Knowledge and understanding Ability to analyze Developing teaching skill Practical application Skill	Theoretical tests Practical tests Reports
3	4	Typical explanation of slides and lecture	Cells of connective tissues	Knowledge and understanding Ability to analyze Developing teaching skill Practical application Skill	Theoretical tests Practical tests Reports
4	4	Typical explanation of slides and lecture	Histological section of Loose & dense connective tissues	Knowledge and understanding Ability to analyze Developing teaching skill Practical application skill	Theoretical tests Practical tests Reports
5	4	Typical explanation of slides and lecture	Histological section of different types of cartilage	Knowledge and understanding Ability to analyze Developing teaching skill Practical application Skill	Theoretical tests Practical tests Reports
6	4	Typical explanation of slides and lecture, preparing reports, and discussing	Histological section of bone	Knowledge and understanding Ability to analyze Developing teaching skill Practical application skill	Theoretical tests Practical tests Reports

7	4	Typical explanation of slides and lecture	blood tissue	Knowledge and understanding Ability to analyze Developing teaching skill Practical application Skill	Theoretical tests Practical tests Reports
8	4		Hemobioti tissue		Theoretical tests Practical tests Reports
9	4	Typical explanation of slides and lecture	Second exam	Knowledge and understanding Ability to analyze Developing teaching skill Practical application Skill	Theoretical tests Practical tests Reports
10	4	Typical explanation of slides and lecture	Types of Muscular tissue	Knowledge and understanding Ability to analyze Developing teaching skill solving problems Practical application skill	Theoretical tests Practical tests Reports
11	4	Explanation, lecture, and presentation of the material using the blackboard and projector. Conducting laboratory experiments, preparing reports, and discussing	Types of nervous ce and nervo tissues	Knowledge and understanding Ability to analyze Developing teaching skill Practical application Skill	Theoretical tests Practical tests Reports
12	4	Typical explanation of slides and lecture	Type of neuroglia	Knowledge and understanding Ability to analyze Developing teaching skill Practical application Skill	Theoretical tests Practical tests Reports
13	4		Study Brain tissue		Theoretical tests Practical tests Reports
14	4	Typical explanation of slides and lecture	Cerebellum and nervous cord	Knowledge and understanding Ability to analyze Developing teaching skill Practical application skill	Theoretical tests Practical tests Reports

15	4	Typical explanation of slides and lecture	second month exam	Knowledge and understanding Ability to analyze Developing teaching skill Practical application skill	Theoretical tests Practical tests Reports
----	---	---	-------------------	---	---

11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports,...etc.

Monthly exams 25 marks

Daily preparation, daily exams and reports 5 marks

Practical exam: 10 marks

Strive 40 degrees

Final exam (45 marks for theoretical exam + 15 marks for practical exam) = 60 marks

12. Learning and Teaching Resources

Required textbooks (curricular books, if any)	Educational histology - Abdul Hakim Ahmed Al-Rawi
Main references (source)	Lowe J,S,Anderson p and Anderson 2018 stevens and lowes Humon E- BOOK :Elservier H ealth Sciences

Course Description

١. Course Name:					
Crimes of the defunct Baath Party					
٢. Course Code:					
٣. Semester / Year:					
Semester					
٤. Description Preparation Date:					
١٧-١٠-٢٠٢٤					
٥. Available Attendance Forms:					
weekly					
٦. Number of Credit Hours (Total) / Number of Units (Total)					
٢ theoretical hours = (٢ hours) per week Number of units (٢)					
٧. Course administrator's name (mention all, if more than one name)					
Name Emad Hassan Salih & Marih Qahtan Qaddory Email: edw.amad@uonanbar.edu.iq maria.qahtan@uonanbar.edu.iq					
٨. Course Objectives					
Course Objectives		<ul style="list-style-type: none"> Introducing students to the crimes of the Baath Party In addition to knowing the violations committed by the former regime against civil and political rights Explaining the effects resulting from the wars on Iraqi soil during the period of the former regime's rule 			
٩. Teaching and Learning Strategies					
Strategy		١- Explanation and clarification, ٢- Lecture method, ٣- Student groups, ٤- Practical lessons in the laboratory and scientific trips, ٥- Brainstorming			
١٠. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
١	٢	Violations of rights and freedoms	Crimes of the defunct Baath Party	theoretical	Theoretical questions and discussions + or exams
	٢	Intellectual rights violations	Crimes of the defunct Baath Party	theoretical	Theoretical questions and

					discussions + or exams
٣	٢	Violation of the right party pluralism	Crimes of the defunct Baath Party	theoretical	Theoretical questions and discussions + or exams
٤	٢	Violation of freedom of opinion	Crimes of the defunct Baath Party	theoretical	Theoretical questions and discussions + or exams
٥	٢	Violation of international law / the first and second Gulf wars	Crimes of the defunct Baath Party	theoretical	Theoretical questions and discussions + or exams
٦	٢	The impact of the Baath regime's behavior on society and its dominance over the state	Crimes of the defunct Baath Party	theoretical	Theoretical questions and discussions + or exams
٧	٢	Limiting the three powers to the Baathist regime	Crimes of the defunct Baath Party	theoretical	Theoretical questions and discussions + or exams
٨	٢	Tyranny corrupts morals and fights scholars	Crimes of the defunct Baath Party	theoretical	Theoretical questions and discussions + or exams
٩	٢	first month Exam	Crimes of the defunct Baath Party		
١٠	٢	The psychological and social mechanisms used by the previous regime	Crimes of the defunct Baath Party	theoretical	Theoretical questions and discussions + or exams
١١	٢	Culture, media, and the militarization of society	Crimes of the defunct Baath Party	theoretical	Theoretical questions and discussions + or exams
١٢	٢	scorched earth policy	Crimes of the defunct Baath Party	theoretical	Theoretical questions and discussions + or exams
١٣	٢	Mass graves and bombing of places of worship	Crimes of the defunct Baath Party	theoretical	Theoretical questions and discussions + or exams
١٤	٢	The effects of the wars in Iraq	Crimes of the defunct Baath Party	theoretical	Theoretical questions and discussions + or exams

					exams
١٥	٢	second month Exam	Crimes of the defunct Baath Party		

١١. Course Evaluation

Do daily tests
 Conduct monthly tests
 Active daily participation during the lecture and opening the door to dialogue

١٢. Learning and Teaching Resources

Required textbooks (curricular books, if any)	Platform for the crimes of the defunct Baath Party
Main references (source)	Encyclopedia of the Iraqi Environment/Salim Matar The effect of the use of radiological weapons on the air and soil / Master's thesis
Recommended books and references (scientific journals, reports...)	Crimes of forced population displacement Adam Suleiman
Electronic references, websites.	Use electronic references and websites

Course Description

1. Course Name: computer

2. Course Code: EWB2103

3. Semester / Year: second semester 2024–2025

4. Description Preparation Date:1/10/2024

5. Available Attendance Forms: Attendance in classrooms and laboratories

6. Number of Credit Hours (Total) :2 / Number of Units (Total): 2

7. Course administrator's name (mention all, if more than one name)

Name: Nazhon Ismail Khaleel

Email: edw.nazhon.khaleel @uoanbar.edu.iq

8. Course Objectives

Course Objectives

1– Networks security basics

2– E–Commerce

3– Identify common hardware and software problems in computers.

4– Define Artificial Intelligence (AI)

5– Applications of AI

6– Ethical Challenges in AI

7– the Future of AI

9. Teaching and Learning Strategies

Strategy

1- Smart Board &Blackboard

2- Data Show

3- Computer

4- Scientific research

5- Theoretical lectures

6- Scientific Laboratories
7- Discussion and dialogue

10. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	2	As in paragraph 8	Security& Networking	Blackboard data show	Question and discussion+ Daily and monthly exams
2	2	As in paragraph 8	Security& Networking	Blackboard data show	Questions and discussion+ Daily and monthly exams
3	2	As in paragraph 8	E-Commerce	Blackboard data show	Questions and discussion+ Daily and monthly exams
4	2	As in paragraph 8	E-Commerce	Blackboard data show	Questions and discussion+ Daily and monthly exams
5	2	As in paragraph 8	Computer Troubleshooting	Blackboard data show	Questions and discussion+ Daily and monthly exams
6	2	As in paragraph 8	Computer Troubleshooting	Blackboard data show	Questions and discussion+ Daily and monthly exams
7			First month exam		
8	2	As in paragraph 8	Introduction to AI	Blackboard data show	Questions and discussion+ Daily and monthly exams
9	2	As in paragraph 8	AI in Our Daily Lives	Blackboard data show	Questions and discussion+ Daily and monthly exams
10	2	As in paragraph 8	Applications of AI	Blackboard data show	Questions and discussion+ Daily and monthly exams
11	2	As in paragraph 8	Applications of AI	Blackboard data show	Questions and discussion+ Daily and monthly exams
12			Second month exam		
13	2	As in paragraph 8	AI and Society	Blackboard data show	Questions and discussion+ Daily and monthly exams
14	2	As in paragraph 8	Ethical Challenges in AI	Blackboard data show	Questions and discussion+ Daily and monthly exams
15	2	As in paragraph 8	The Future of AI	Blackboard data show	Questions and discussion+ Daily and monthly exams

11. Course Evaluation

Distribution of the grade out of 100 according to the tasks assigned to the student,
Annual pursuit 40% (Monthly exam : 20% , Daily exam : 5% , Reports : 5% , Practical exam : 10%)
Final exam : 60%

12. Learning and Teaching Resources

Required textbooks (curricular books, if any)

Course Description

1. Course Name:	
General Arabic	
2. Course Code:	
Ewb 1202	
3. Semester / Year:	
2024 / 2025	
4. Description Preparation Date:	
2024 /12 / 1	
5. Available Attendance Forms:	
Classroom	
6. Number of Credit Hours (Total) / Number of Units (Total)	
Number of Credit Hours : 2 Number of Units : 2	
7. Course administrator's name (mention all, if more than one name)	
Name: Assist lect. Inas Hameed Nida Email: inas.hameed@uonanbar.edu.iq	
8. Course Objectives	
Course Objectives	<ol style="list-style-type: none"> 1. Improve the quality of academic and functional writing associated with school education. 2. Correct common spelling mistakes and the use of punctuation marks. 3. Apply grammar and spelling rules in writing sentences and paragraphs in correct language. 4. Analysis of the structure of educational and pedagogical texts in terms of style and meaning 5. Develop confidence in written and oral expression in teaching and learning situations.
9. Teaching and Learning Strategies	
Strategy	<ol style="list-style-type: none"> 1.Solving direct applied exercises: to train the student to employ grammar and spelling rules. 2.Individual class presentations: to train students on proper pronunciation and eloquent presentation. 3.Gradual training of sound writing in terms of form and meaning. 4.Group activities: such as brainstorming and correcting common mistakes in texts.

5. Continuous feedback: written and oral on language performance.

10. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
Week 1	2	Developing students' basic language skills, enhancing their ability to analyze texts and correct common mistakes, while consolidating the communicative and cultural function of the Arabic language in educational and professional contexts.	Rules for writing soft, redundant and deleted alphanumeric	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports
Week 2	2	Developing students' basic language skills, enhancing their ability to analyze texts and correct common mistakes, while consolidating the communicative and cultural function of the Arabic language in educational and professional contexts.	Open and bound t-writing rules	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports
Week 3	2	Developing students' basic language skills, enhancing their ability to analyze texts and correct common mistakes, while consolidating the communicative and cultural function of the Arabic language in educational and professional contexts.	Condition style	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports
Week 4	2	Developing students' basic language skills, enhancing their ability to analyze texts and correct common mistakes,	Texts of nature poetry	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports

		while consolidating the communicative and cultural function of the Arabic language in educational and professional contexts.			
Week 5	2	Developing students ' basic language skills, enhancing their ability to analyze texts and correct common mistakes, while consolidating the communicative and cultural function of the Arabic language in educational and professional contexts.	Ditransitive Verb	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports
Week 6	2	Developing students ' basic language skills, enhancing their ability to analyze texts and correct common mistakes, while consolidating the communicative and cultural function of the Arabic language in educational and professional contexts.	Sources	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports
Week 7	2	Developing students ' basic language skills, enhancing their ability to analyze texts and correct common mistakes, while consolidating the communicative and cultural function of the Arabic language in educational and professional contexts.	Texts from the literature of letters	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports
Week 8	2	Developing students ' basic language skills, enhancing their ability to analyze texts and correct	Text from the Holy Quran (Surat Al-Imran)	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports

		common mistakes, while consolidating the communicative and cultural function of the Arabic language in educational and professional contexts.			
Week 9	2	Developing students ' basic language skills, enhancing their ability to analyze texts and correct common mistakes, while consolidating the communicative and cultural function of the Arabic language in educational and professional contexts.	Texts from the literature of oratory	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports
Week 10	2	Developing students ' basic language skills, enhancing their ability to analyze texts and correct common mistakes, while consolidating the communicative and cultural function of the Arabic language in educational and professional contexts.	Derivatives (subject name, object name)	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports
Week 11	2	Developing students ' basic language skills, enhancing their ability to analyze texts and correct common mistakes, while consolidating the communicative and cultural function of the Arabic language in educational and professional contexts.	Derivatives (adjective-like) formulation and action	The blackboard, the method of class participation and the method of diction	Daily tests +assignments +reports

Course Description

1. Course Name:					
Basics of general entomology					
2. Course Code:					
EWB3302					
Semester / Year:					
Semester					
Description Preparation Date:					
2024 - 2025					
Available Attendance Forms:					
weekly					
Number of Credit Hours (Total) / Number of Units (Total)					
2 theoretical hours + 2 practical hours = (4 hours) per week Number of units (3)					
Course administrator's name (mention all, if more than one name)					
Name: Lecture Dr. Imtithal Ismael Jaloot, I' man Fouad & Ghufran Taha Email: Edw.kaliomer2004@uoanbar.edu.iq					
Course Objectives					
Course Objectives	Introducing students to the shape, behavior, nature and habits of insects the diversity of their members and their spread in all environments and various places; In the soil, in cold and hot regions. Identifying the morphological characteristics of insects and their internal structure				
Teaching and Learning Strategies					
Strategy	Explanation and clarification 2- The method of the lecture 3- Student groups 4- Practical lessons in the laboratory and scientific trips .				
Course Structure					
Week	Hrs	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	4	Introduction to the position of insects in the animal kingdom and theories of the emergence of insects and their importance	Basics of general entomology	Explanation and presentation of the slide model and lecture	Theoretical tests Practical test Reports

2	4	Morphology of insects	Basics of general entomology	Explanation and presentation of the slide model and lecture	Theoretical tests Practical test Reports
3	4	The thorax and appendages	Basics of general entomology	Explanation and presentation of the slide model and lecture	Theoretical tests Practical test Reports
4	4	The abdominal and appendage	Basics of general entomology	Explanation and presentation of the slide model and lecture	Theoretical tests Practical test Reports
5	4	The first exam	Basics of general entomology	Explanation and presentation of the slide model and lecture	Theoretical tests Practical test Reports
6	4	The Respiratory system	Basics of general entomology	Explanation and presentation of the slide model and lecture	Theoretical tests Practical test Reports
7	4	The Digestive System	Basics of general entomology	Explanation and presentation of the slide model and lecture	Theoretical tests Practical test Reports
8	4	The Excretory organs	Basics of general entomology	Explanation and presentation of the slide model and lecture	Theoretical tests Practical test Reports
9	4	The Reproductive System	Basics of general entomology	Explanation and presentation of the slide model and lecture	Theoretical tests Practical test Reports
10	4	The Nervous System	Basics of general entomology	Explanation and presentation of the slide model and lecture	Theoretical tests Practical test Reports
11	4	The Circulatory System	Basics of general entomology	Explanation and presentation of the slide model and lecture	Theoretical tests Practical test Reports
12	4	Sensory organs in insects	Basics of general entomology	Explanation and presentation Of the slide	Theoretical tests Practical test

				Model and lecture	Reports
13	4	Development & metamorphosis	Basics of general entomology	Explanation and presentation of the slide model and lecture	Theoretical tests Practical test Reports
14	4	Classification of insects	Basics of general entomology	Explanation and presentation of the slide model and lecture	Theoretical tests Practical test Reports
15	4	The second exam	Basics of general entomology	Explanation and presentation of the slide model and lecture	Theoretical tests Practical test Reports

Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports, ...etc.

Monthly exams 25 marks

Daily preparation, daily exams and reports 5 marks

Practical exam: 10 marks

Strive 40 degrees

Final exam (45 marks for theoretical exam + 15 marks for practical exam) = 60 marks

Learning and Teaching Resources

Required textbooks (curricular books, if any)	General entomology Written by: Hussein Abbas Al-Ali, d. Nidal Mahdi Al Fund Practical Entomology Book By Abdul Latif Mulan
Main references (source)	Principle Of General Entomology By Pr. Bedir M. Al. Azawi
Recommended books and references (scientific journals, reports...)	The Insects: An Outline of Entomology, 4th Edition By P. J. Gullan & P.S. Cranston

The ninth	2	In the ninth paragraph	Curriculum evaluation forms	Theoretical	Theoretical question and discussion
The tenth	2	In the ninth paragraph	Curriculum evaluation	Theoretical	Theoretical question and discussion
The eleven	2	In the ninth paragraph	What is meant by curriculum evaluation?	Theoretical	Theoretical question and discussion
The twelve	2	In the ninth paragraph	The teacher and the curriculum	Theoretical	Theoretical question and discussion
The thirteen	2	In the ninth paragraph	Test	Theoretical	Theoretical question and discussion
The fourteen	2	In the ninth paragraph	Textbook analysis	Theoretical	Theoretical question and discussion
The fifteen	2	In the ninth paragraph		Theoretical	Theoretical question and discussion

Course Description

1. Course Name:	comparative anatomy of chordate 1
2.	Course Code: EWB3301
3. Semester / Year:	Year\ first
4. Description Preparation Date:	2024-2025
5. Available Attendance Forms:	Weekly
6. Number of Credit Hours (Total) / Number of Units (Total)	2 theoretical hours + 2 practical hours = (4 hours) per week Number of units (3)
7. Course administrator's name (mention all, if more than one name)	Name: Hanan Fawzi Salman Email: hanan.fawzi@uoanbae.edu.iq

8. Course Objectives	
Course Objectives	<ul style="list-style-type: none"> • • Students learned about the most important phyla included in the classification of chordates • • Students learned about comparisons between animals through internal anatomy and comparison of their systems and organs • • In addition to studying all types and orders of animal groups • • Introducing students to the most important characteristics and characteristics of chordates.....

9. Teaching and Learning Strategies	
Strategy	1- Explanation and clarification, 2- Lecture method, 3- Student groups, 4- Practical lessons in the laboratory and scientific trips, 5- Brainstorming

10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	4	Characteristics of chordates	chordate	Explanation presentation the slide method and lecture	Theoretical tests Practical tests Reports

2	4	Tetrapoda group	chordata	Explanation presentation the slide mc and lecture	Theoretical tests Practical tests Reports
3	4	Protochordata	chordata	Explanation presentation the slide mc and lecture	Theoretical tests Practical tests Reports
4	4	Amphioxus	chordata	Explanation presentation the slide mc and lecture	Theoretical tests Practical tests Reports
5	4	Amphibians	Chordata	Explanation presentation the slide mc and lecture	Theoretical tests Practical tests Reports
6	4	First month exam	chordata		Theoretical tests Practical tests Reports
7	4	Reptile class	chordata	Explanation presentation the slide mc and lecture	Theoretical tests Practical tests Reports
8	4	Aves class	chordata	Explanation presentation the slide mc and lecture	Theoretical tests Practical tests Reports
9	4	Feathers and leather appendages	chordata	Explanation presentation the slide mc and lecture	Theoretical tests Practical tests Reports
10	4	Mammalia class	chordata	Explanation presentation the slide mc and lecture	Theoretical tests Practical tests Reports
11	4	Placental mammals	chordata	Explanation presentation the slide mc and lecture	Theoretical tests Practical tests Reports
12	4	Second month exam	chordata		Theoretical tests Practical tests Reports
13	4	Accessory gland of the skin in mammals	chordata	Explanation presentation the slide mc and lecture	Theoretical tests Practical tests Reports
14	4	Ruminants	chordata	Explanation presentation the slide mc and lecture	Theoretical tests Practical tests Reports
15	4	Digestive mechanism in ruminants	chordata	Explanation presentation the slide mc and lecture	Theoretical tests Practical tests Reports

11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports,...etc.

Monthly exams 25 marks

Daily preparation, daily exams and reports 5 marks

Practical exam: 10 marks

Strive 40 degrees

Final exam (45 marks for theoretical exam + 15 marks for practical exam) = 60 marks

12. Learning and Teaching Resources

Required textbooks (curricular books, if any)	-Basics of comparative anatomy of chordates / written by Shukri Habib Khalil, Abdul Zahra Kazem
Main references (source)	Book: Comparative Anatomy of Vertebrates Written by: Dr. Mona Farid Abdel Rahman
Recommended books and references (scientific journals, reports...)	Atlas of comparative anatomy of chordates
Electronic references, websites.	Use electronic references and websites

Course Description

1. Course Name:	
Algae	
2. Course Code:	
EWb3204	
3. Semester / Year:	
2025/2024	
4. Description Preparation Date:	
2025/2024	
5. Available Attendance Forms:	
Classroom and Laboratory	
6. Number of Credit Hours (Total) / Number of Units (Total)	
Number of Credit Hours : 2 Number of Units : 2	
7. Course administrator's name (mention all, if more than one name)	
Name: Ass. Proff Abdul-Nasir Abdulla Mahdi & Ass.T.Rana Salim Farhan Email: edw.nasir63abdulla@uoanbar.edu.iq&rana.s.farhan@uoanbar.edu.iq	
8. Course Objectives	
Course Objectives	Identify algae Its iocation in the plant kingdom Its classification , presence , and methods of reproduction Its benefits and harms .
9. Teaching and Learning Strategies	
Strategy	1- Daily and monthly testes 2- Writing reports related to the material . 3- Ask questions and discuss them with students . 4- Assigning students to search for the latest developme in the subject on websites 5- Use of electronic clarification means.

10. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
Week 1	2	To prepare the student to be a successful biology teacher or researcher	Introduction	Lecture , electron presentation and discussion	Theoretical question , discussions , and oral tests
Week 2	2	To prepare the student to be a successful biology teacher researcher	The Basis of Classification of Algae	Lecture , electron presentation and discussion	Theoretical question , discussions , and oral tests
Week 3	2	To prepare the student to be a successful biology teacher researcher	General Classification of Algae	Lecture , electron presentation and discussion	Theoretical question , discussions , and oral tests
Week 4	2	To prepare the student to be a successful biology teacher researcher	Division : Chlorophyta	Lecture , electron presentation and discussion	Theoretical question , discussions , and oral tests
Week 5	2	To prepare the student to be a successful biology teacher researcher	Order : Tetrasporales	Lecture , electron presentation and discussion	Theoretical question , discussions , and oral tests
Week 6	2	To prepare the student to be a successful biology teacher researcher	Order : Zygnematales	Lecture , electron presentation and discussion	Theoretical question , discussions , and oral tests
Week 7	2	To prepare the student to be a successful biology teacher researcher	Monthly Exam 1	Lecture , electron presentation and discussion	Theoretical question , discussions , and oral tests
Week 8	2	To prepare the student to be a successful biology teacher researcher	Division : Chrysophyta (Golden Algae)	Lecture , electron presentation and discussion	Theoretical question , discussions , and oral tests
Week 9	2	To prepare the student to be a successful biology teacher	Class : Bacillariophyceae (Diatoms)	Lecture , electron presentation and discussion	Theoretical question , discussions , and oral tests

		researcher			
Week 10	2	To prepare the student to be a successful biology teacher researcher	Division : Pyrrophyta	Lecture , electron presentation and discussion	Theoretical question , discussions , and oral tests
Week 11	2	To prepare the student to be a successful biology teacher researcher	Class : Heterogenerate	Lecture , electron presentation and discussion	Theoretical question , discussions , and oral tests
Week 12	2	To prepare the student to be a successful biology teacher researcher	Monthly Exam.	Lecture , electron presentation and discussion	Theoretical question , discussions , and oral tests
Week 13	2	To prepare the student to be a successful biology teacher researcher	Division : Rhodophyta	Lecture , electron presentation and discussion	Theoretical question , discussions , and oral tests
Week 14	2	To prepare the student to be a successful biology teacher or researcher	Ecological and Economic Importance of Alg	Lecture , electron presentation and discussion	Theoretical question , discussions , and oral tests
Week 15	2	To prepare the student to be a successful biology teacher or researcher	Monthly Exam.	Lecture , electron presentation and discussion	Theoretical question , discussions , and oral tests

11. Course Evaluation

Monthly exam : 20% , Daily exam : 5% , Reports : 5% , Practical exam : 10% , Final exam : 60%

12. Learning and Teaching Resources

Required textbooks (curricular books, if any)	1- Algae and Archegoneates by dr. Bah K.M. and Dr. Ali H. Al-Saadi 2- Website
Main references (source)	Lectures led by the subject professor
Recommended books and references (scientific journals, reports...)	
Electronic references, websites.

Course Description

1. Course Name:	
Parasitology1	
2. Course Code:	
3. Semester / Year:	
First course 2025–2024	
4. Description Preparation Date:	
2024/10/12	
5. Available Attendance Forms:	
Weekly	
6. Number of Credit Hours (Total) / Number of Units (Total)	
3/ 4	
7. Course administrator's name (mention all, if more than one name)	
<p>Names: Thefaf abduallah ahmed , Ghadir Mahmmoud Nejm Al_Rubaie Duaa jameel helal Ban Hussein Ali</p> <p>Emails: Edw.thefaf_abd@uoanbar.edu.iq ghadeer.najim@uoanbar.edu.iq duaajameel@uoanbar.edu.iq ban.hussien@uoanbar.edu.iq</p>	
8. Course Objectives	
Course Objectives	<ul style="list-style-type: none"> • Knowledge of medical parasitology • Knowledge what protzoa • Their most important type • and their medical importance <p style="margin-left: 40px;">Knowledge of Protozoa.platyhelminthes</p>
9. Teaching and Learning Strategies	
Strategy	The lecture is explained and clarified by presenting it to the students on the screen and re-clarifying it practically, after which the student is tested through daily exams.

10. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	4	Introduction of parasitology	Parasitology1	A theoretical and practical lecture	Daily exams and daily assignments
Second	4	Protozoa,sarcodina and Their species	=	=	=
Third	4	Class flagellates. Blood and tissue flagellates and their genera.	=	=	=
Fourth	4	Class flagellates. intestinal flagellates and their genera	=	=	=
Fifth	4	ciliophora	=	=	=
Sixth	2	First month exam	=		
Seventh	4	Class sporozoa. Blood and tissue sporozoaand their genera	=	Practical and theoretical exam	=
Eighth	4	Class sporozoa. intestinal sporozoa and their genera	=	A theoretical and practical lecture	=
Ninth	4	Classification of platyhelminthes	=	=	=
Tenth	4	Liver fluks,fasciola ,heterephyes	=	=	=
Eleventh	2	second month exam	=	Practical and theoretical exam	=
Twelveth	4	intestinal fluke,fasciolpsis	=	=	=
Thirteenth	4	cestoda and their genera	=	A theoretical and practical lecture	

--	--	--	--	--	--

11. Course Evaluation

The grade is distributed out of 100 according to the theoretical exams: 20 marks, the practical exams: 10 marks, the daily exams: 5 marks, and the daily assignments: 5 marks. The final exam is 60 marks, divided into 15 practical marks and 40 theoretical marks.

12. Learning and Teaching Resources

Required textbooks (curricular books, if any)	
Main references (source)	Book of parasitology
Recommended books and references (scientific journals, reports...)	
Electronic references, websites.	

Course Description

1. Course Name:	
Animal Physiology	
2. Course Code:	
WEB3312	
3. Semester / Year:	
Semester (2024–2025)	
4. Description Preparation Date:	
1-9-2024	
5. Available Attendance Forms:	
Weekly	
6. Number of Credit Hours (Total) / Number of Units (Total)	
2 theoretical hours + 2 practical hours = (4 hours) per week Number of units (3)	
7. Course administrator's name (mention all, if more than one name)	
Dr.Nedhal Ibrahim Lateff	edw.nedhal_79@uoanbar.edu.iq
Ghadeer Mahmood Najm	ag.ghadeer.mahmood@uoanbar.edu.iq
Nbaa Mutea Abid AL-Alh	naba.mutia@uoanbar.edu.iq
Nuha Hatem Khalif	nuha.tatem@uoanbar.edu.iq
Duaa jameel Hilal	duaajameel@uoanbar.edu.iq
Ghofran Taha Mahdi	
8. Course Objectives	
It aims to introduce the student to physiology, its importance, the relationship of the body's organs to each other functionally, and how to maintain these functions in a homeostatic state without the influence of external and internal conditions.	
• Knowing some of the medical conditions that accompany organ dysfunction	
9. Teaching and Learning Strategies	
Strategy	<ul style="list-style-type: none">• Presenting the lecture through a meeting using the blackboard or projector (data show)- dialogue - group discussion - investigation and exploration - problem solving - scientific research - practical

application in the laboratory -
brainstorming.

10. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	4	Explanation, lecture, and presentation of the material using the whiteboard and projector. Conducting laboratory experiments, preparing reports, and discussing	Circulation physiology1	Knowledge and understanding Ability to analyze Developing teaching skill solving problems Practical application skill	Theoretical tests Practical tests Reports
2	4	Explanation, lecture, and presentation of the material using the whiteboard and projector. Conducting laboratory experiments, preparing reports, and discussing	Circulation physiology2	Knowledge and understanding Ability to analyze Developing teaching skill solving problems Practical application skill	Theoretical tests Practical tests Reports
3	4	Explanation, lecture, and presentation of the material using the whiteboard and projector. Conducting laboratory experiments, preparing reports, and discussing	Circulation physiology3	Knowledge and understanding Ability to analyze Developing teaching skill solving problems Practical application skill	Theoretical tests Practical tests Reports
4	4	Explanation, lecture, and presentation of the material using the whiteboard and projector. Conducting laboratory experiments, preparing reports, and discussing	Respiratory physiology1	Knowledge and understanding Ability to analyze Developing teaching skill solving problems Practical application skill	Theoretical tests Practical tests Reports
5	4	Explanation, lecture, and presentation of the material using the whiteboard and projector. Conducting laboratory experiments, preparing reports, and discussing	Respiratory physiology2	Knowledge and understanding Ability to analyze Developing teaching skill solving problems Practical application skill	Theoretical tests Practical tests Reports

6	4	Explanation, lecture, and presentation of the material using the whiteboard and projector. Conducting laboratory experiments, preparing reports, and discussing	Regulation of body fluid or homeostasis	Knowledge and understanding Ability to analyze Developing teaching skill solving problems Practical application skill	Theoretical tests Practical tests Reports
7	4	Explanation, lecture, and presentation of the material using the whiteboard and projector. Conducting laboratory experiments, preparing reports, and discussing	Physiology of kidney	Knowledge and understanding Ability to analyze Developing teaching skill solving problems Practical application skill	Theoretical tests Practical tests Reports
8	4		First month exam		Theoretical tests Practical tests Reports
9	4	Explanation, lecture, and presentation of the material using the whiteboard and projector. Conducting laboratory experiments, preparing reports, and discussing	Digestive physiology1	Knowledge and understanding Ability to analyze Developing teaching skill solving problems Practical application skill	Theoretical tests Practical tests Reports
10	4	Explanation, lecture, and presentation of the material using the whiteboard and projector. Conducting laboratory experiments, preparing reports, and discussing	Digestive physiology2	Knowledge and understanding Ability to analyze Developing teaching skill solving problems Practical application skill	Theoretical tests Practical tests Reports
11	4	Explanation, lecture, and presentation of the material using the blackwhiteboard a projector. Conducting laboratory experiments, preparing reports, and discussing	Temperature regulation	Knowledge and understanding Ability to analyze Developing teaching skill solving problems Practical application skill	Theoretical tests Practical tests Reports

12	4	Explanation, lecture, and presentation of the material using the whiteboard and projector. Conducting laboratory experiments, preparing reports, and discussing	General energy metabolism	Knowledge and understanding Ability to analyze Developing teaching skill solving problems Practical application skill	Theoretical tests Practical tests Reports
13	4	Explanation, lecture, and presentation of the material using the whiteboard and projector. Conducting laboratory experiments, preparing reports, and discussing	Nervous physiology	Knowledge and understanding Ability to analyze Developing teaching skill solving problems Practical application skill	Theoretical tests Practical tests Reports
14	4		second month exam		Theoretical tests Practical tests Reports
15	4	Explanation, lecture, and presentation of the material using the whiteboard and projector. Conducting laboratory experiments, preparing reports, and discussing	Muscles physiology	Knowledge and understanding Ability to analyze Developing teaching skill solving problems Practical application skill	Theoretical tests Practical tests Reports

11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports,...etc.

Monthly exams 25 marks

Daily preparation, daily exams and reports 5 marks

Practical exam: 10 marks

Strive 40 degrees

Final exam (45 marks for theoretical exam + 15 marks for practical exam) = 60 marks

12. Learning and Teaching Resources

Required textbooks (curricular books, if any)	Youssef Muhammad Arab, Sabah Nasser Al-Alouji, Farouk Naji Karmasha, Marwan Abdel Rahim Yas. Animal Physiology.1989

2 theoretical hours + 2 practical hours = (4hours) per week Number of units (3)					
7. Course administrator's name (mention all, if more than one name)					
Name: Lecturer Dr. Ali Hussein Ibraheem Al-Bayati					
Email: ag.alihussein@uoanbar.edu.iq					
Name: Lecturer Asmaa Abdulameer Bedan					
Email: asmaa.abdulameer@uoanbar.edu.iq					
8. Course Objectives					
Course Objectives			The course aims to enable the student to identify and study some of the vital processes carried by plants.		
9. Teaching and Learning Strategies					
Strategy	<p>Providing clear, systematic lectures in easy language for the learner. Lectures are constantly updated.</p> <p>Asking direct questions to all students to find out the extent of their interaction and to get the rest to pay attention.</p> <p>Asking indirect questions about the topic to determine the extent of the understanding.</p> <p>Harnessing the information display device (Data show) to clarify different aspects of the topic.</p> <p>Provide and display illustrative images.</p> <p>Apply what the student learns during the theoretical lesson in a practical lesson as much as possible.</p>				
10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	2Theoretical 2practical	Knowledge	Introduction to the concept of plant physiology	Use the whiteboard and display screen	Daily exam and oral questions
2	2Theoretical 2practical	Knowledge	Colloidal solutions and plant water relations	Use the whiteboard and display screen	Daily exam and oral questions
3	2Theoretical 2practical	Knowledge	Diffusion of gases and liquids	Use the whiteboard and display screen	Daily exam and oral questions
4	2Theoretical 2practical	Knowledge	Osmotic potential and water pressure	Use the whiteboard and display screen	Daily exam and oral questions

5	2Theoretic 2practical	Knowledge	Water absorption and transfer in plants	Use the whiteboard and display screen	Daily exam and oral questions
6	2Theoretic 2practical		First month exam		
7	2Theoretic 2practical	Knowledge	Transpiration and factors affecting it, mineral nutrition and passive and active absorption	Use the whiteboard and display screen	Daily exam and oral questions
8	2Theoretic 2practical	Knowledge	Photosynthesis and light reactions	Use the whiteboard and display screen	Daily exam and oral questions
9	2Theoretic 2practical	Knowledge	Dark reactions and factors affecting photosynthesis	Use the whiteboard and display screen	Daily exam and oral questions
10	2Theoretic 2practical	Knowledge	Breathing and its types	Use the whiteboard and display screen	Daily exam and oral questions
11	2Theoretic 2practical	Knowledge	Plant growth and formation	Use the whiteboard and display screen	Daily exam and oral questions
12	2Theoretic 2practical		Second month exam		
13	2Theoretic 2practical	Knowledge	Growth regulators Gibberellins and cytokinins	Use the whiteboard and display screen	Daily exam and oral questions
14	2Theoretic 2practical	Knowledge	Absciscic acid and ethylene	Use the whiteboard and display screen	Daily exam and oral questions
15	2Theoretic 2practical	Knowledge	Germination and seed viability	Use the whiteboard and display screen	Daily exam and oral questions

11.Course Evaluation

Monthly exams 25 marks
Daily preparation, daily exams and reports 5 marks
Practical exam: 10 marks
Strive 40 degrees
Final exam (45 marks for theoretical exam + 15 marks for practical exam) = 60 marks
Quest with final = 100 marks

12.Learning and Teaching Resources

Required textbooks (curricular books, if any)	Plant physiology, part one and two (translated). Translated by Dr. Edited by Ramadan and Dr. Hanaa Fadel
Main references (source)	The science of plant growth and formation Dr. Abdel Azim Muhammad.
Recommended books and references (scientific journals, reports...)	Lectures on theoretical and practical plant physiology Botany book, second section, plant physiology, Dr. About Yasser Al-Qishan College of Science, Department of Biology and Biotechnology
Electronic references, websites.	Use electronic references and websites

Course Description

1. Course Name:					
MYCOLOGY					
2. Course Code:					
EWB3309					
3. Semester / Year:					
Semester					
4. Description Preparation Date:					
2024					
5. Available Attendance Forms:					
Weekly					
6. Number of Credit Hours (Total) / Number of Units (Total)					
2 theoretical hours + 2 practical hours = (4 hours) per week					
Number of units (3)					
7. Course administrator's name (mention all, if more than one name)					
Name: Saja Yehia Abdouljaleel Hebatallah adel abdullah Estbrak Yahya Ashour					
Email: edw.saja76bio@uoanbar.edu.iq hebatallah85@uoanbar.edu.iq estbrak. Yahya@uoanbar.edu.iq					
8. Course Objectives					
Course Objectives			<ul style="list-style-type: none"> Detailed definition of the meaning of mycology for the student. Introducing the student to the classification systems of fungi. Introducing the student to the life cycles of fungi and the methods of reproduction available to them. Study the most important diseases caused by fungi to plants in detail. 		
9. Teaching and Learning Strategies					
Strategy		1- Explanation and clarification, 2- Lecture method, 3- Student groups, 4- Practical lessons in the laboratory and scientific trips, 5- Brainstorming			
10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	4	Define mycology	Fungi	Explanation model presentation slides - a lecture	Theoretic Tests Practical tests Reports

2	4	Introduction mycology	Fungi	Explanation model presentation slides - lecture	Theoretic Tests Practical tests Reports
3	4	Introduction mycology	Fungi	Explanation model presentation slides - lecture	Theoretic Tests Practical tests Reports
4	4	Study of components of fungal cell	Fungi	Explanation model presentation slides - lecture	Theoretical Tests Practical tests Reports
5	4	The basis for classification of fun	Fungi	Explanation model presentation slides - a lecture	Theoretical Tests Practical tests Reports
6	4	Study of oomycetes	Fungi	lanation - model presentation es - and lecture	Theoretical Tests Practical tests Reports
7	4	Study of dov mildew diseases	Fungi	Explanation model presentation slides - a lecture	Theoretical Tests Practical tests Reports
8	4	The study Zygomycota	Fungi	Explanation model presentation slides - a lecture	Theoretical Tests Practical tests Reports
9	4	The study Ascomycota	Fungi	Explanation model presentation slides - a lecture	Theoretical Tests Practical tests Reports
10	4	Study of Discomycoc	Fungi	Explanation model presentation slides - a lecture	Theoretical Tests Practical tests Reports
11	4	Study Loculoascomycota	Fungi	Explanation model presentation slides - a lecture	Theoretical Tests Practical tests Reports

				lecture	
12	4	Study of Basidiomycota	Fungi	Explanation model presentation slides - a lecture	Theoretical Tests Practical tests Reports
13	4	Study of Smith fungi	Fungi	Explanation model presentation slides - a lecture	Theoretical Tests Practical tests Reports
14	4	Study of Rust fungi	Fungi	Explanation model presentation slides - a lecture	Theoretical Tests Practical tests Reports
15	4	Study Deuttomycota	Fungi	Explanation model presentation slides - a lecture	Theoretical Tests Practical tests Reports

11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports,...etc.

Monthly exams 25 marks

Daily preparation, daily exams and reports 5 marks

Practical exam: 10 marks

Strive 40 degrees

Final exam (45 marks for theoretical exam + 15 marks for practical exam) = 60 marks

12. Learning and Teaching Resources

Required textbooks (curricular books, if any)	Fundamentals of medical mycology Ahmed Sami Salman Faza . Introduction to mycology Abdul Aziz Majid Nakhilan . Fundamentals of mycology Abdul Aziz Majid Nakhilan
Main references (source)	Practical mycology Abdul Reda Taha Sarhan . Practical book on medicinal fungi Ibrahim Ali Al-Tayyar
Recommended books and references (scientific journals, reports...)	guest Lectures from other country or University internship , field studies
Electronic references, websites.	Use electronic references and websites

Course Description

1- Course Name: Measurement and evaluation in the educational process					
2- Course Code: : Measurement and evaluation					
3- Semester / Year:2024-2025					
4- Date this description was prepared: 13/2/2024					
5- Available attendance forms:my presence					
6- Number of study hours (total)\number of units (total):12 o'clock					
7- Name of the official judge (if more than one name is prohibited) Dher.alani@uoanbar.edu.iq					
8- Course objectives:					
Objectives of the study subject:		<ul style="list-style-type: none"> • * Covering tagets subigt : Measurement and evaluation *Learn about ut the importance of measurement * Familiarity with some measurement and evaluation testng the meanings of vocabulary, --identify objective and achievement tests 			
9. Teaching and learning strategies					
The strategy		<p>af almaerifiat :- an tariffs altaalibat eilm alarshad binaweih wan tuadih altaalibat ahimiat alarshad __ tubdi altaalibat rayha hawl alaikhtibarat</p> <p>alahdaf almaharatiat :- an tumaris altaalibat siaghat aliahdaf _ an tunaqish altaalibat mumayizat aliakhtibarat</p> <p>alahdaf alwijdaniat :- tatwir qudrat altaalib ealaa aleamal _ altafkir almantiqi _ an yatahamas altaalib alaa akhudh dawr aldurus</p>			
10- Course structure					
Week	Hours	Required	Name of the unit or	Learning	Evaluation

		learning outcomes	topic	method	method
The First	2	In the ninth paragraph	Basic concepts in measurement and evaluation	Theoretical	Theoretical question and discussion
The Second	2	In the ninth paragraph	Types of calendar	Theoretical	Theoretical question and discussion
The Third	2		Behavioral goals	Theoretical	Theoretical question and discussion
The fourth	2	In the ninth paragraph	Test map	Theoretical	Theoretical question and discussion
The fifth	2		the test 1	Theoretical	Theoretical question and discussion
The sixte	2	In the ninth paragraph	Types of achievement tests	Theoretical	Theoretical question and discussion
The sevent	2		Essay tests	Theoretical	Theoretical question and discussion
The eighth	2	In the ninth paragraph	Objective tests	Theoretical	Theoretical question and discussion
The ninte	2	In the ninth paragraph	Performance tests	Theoretical	Theoretical question and discussion
The ninte	2	In the ninth paragraph	Paragraph analysis	Theoretical	Theoretical question and discussion
The eleven	2	In the ninth paragraph	The ease and difficulty of essay paragraphs	Theoretical	Theoretical question and discussion
The twelve	2	In the ninth paragraph	Ease and difficulty of objective paragraphs	Theoretical	Theoretical question and discussion
The thirteen	2	In the ninth paragraph	Highlight essay paragraphs	Theoretical	Theoretical question and discussion
The fourtee	2	In the ninth paragraph	Highlight thematic paragraphs	Theoretical	Theoretical question and discussion
The fifteen	2	In the ninth paragraph	Test 2	Theoretical	Theoretical question and discussion

Course Description

1. Course Name:					
Immunity					
2. Course Code:					
EWB3409					
3. Semester / Year:					
Semester					
4. Description Preparation Date:					
2024					
5. Available Attendance Forms:					
weekly					
6. Number of Credit Hours (Total) / Number of Units (Total)					
2 theoretical hours + 2 practical hours = (4 hours) per week Number of units (3)					
7. Course administrator's name (mention all, if more than one name)					
Name: . Dr. Hanan Fawzi Salman & Dr. wafa talea Email: hanan.fawzi@uoanbar.edu.iq					
8. Course Objectives					
Course Objectives			<ul style="list-style-type: none"> • • Introducing students to the role of immune ce in resisting diseases • And learn about the mechanical mechanisms of work • As well as the importance of immunity in our da lives and how the body responds when a foreign body enters 		
9. Teaching and Learning Strategies					
Strategy		1- Explanation and clarification, 2- Lecture method, 3- Student groups, 4- Practical lessons in the laboratory and scientific trips, 5- Brainstorming			
10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method

1	4	Introduction to history of immunology	Immunity	Explanation presentation of slide model lecture	Theoretical test Practical tests Reports
2	4	The lymph system and components	Immunity	Explanation presentation of slide model lecture	Theoretical test Practical tests Reports
3	4	Acquired and innate immunity	Immunity	Explanation presentation of slide model lecture	Theoretical test Practical tests Reports
4	4	Antibodies, their types and functions	Immunity	Explanation presentation of slide model lecture	Theoretical test Practical tests Reports
5	4	Antigens	Immunity	Explanation presentation of slide model lecture	Theoretical test Practical tests Reports
6	4	First month exam	Immunity		Theoretical test Practical tests Reports
7	4	Immune receptors	Immunity	Explanation presentation of slide model lecture	Theoretical test Practical tests Reports
8	4	Immune response	Immunity	Explanation presentation of slide model lecture	Theoretical test Practical tests Reports
9	4	Complementary system	Immunity	Explanation presentation of slide model lecture	Theoretical test Practical tests Reports
10	4	Serums, vaccines, and methods of manufacturing them	Immunity	Explanation presentation of slide model lecture	Theoretical test Practical tests Reports
11	4	Inflammation infection, their types and symptoms	Immunity	Explanation presentation of slide model lecture	Theoretical test Practical tests Reports
12	4	Second month exam	Immunity		Theoretical test Practical tests Reports
13	4	Allergies	Immunity	Explanation presentation of slide model lecture	Theoretical test Practical tests Reports

14	4	Immunodeficiency diseases	Immunity	Explanation presentation of slide model lecture	Theoretical tests Practical tests Reports
15	4	Autoimmune diseases	Immunity	Explanation presentation of slide model lecture	Theoretical tests Practical tests Reports

11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports,...etc.

Monthly exams 25 marks

Daily preparation, daily exams and reports 5 marks

Practical exam: 10 marks

Strive 40 degrees

Final exam (45 marks for theoretical exam + 15 marks for practical exam) = 60 marks

12. Learning and Teaching Resources

Required textbooks (curricular books, if any)	Lippincotts Illustrated Reviews- Richard Harf
Main references (source)	Basic science principles and immunological tes James Abdel Rahman Fundamentals of physic Mohamed Abdel Aziz
Recommended books and references (scientific journals, reports...)	Cellular and Molecular Immunology - Paul Andrew H. Lichtman Practical immunobinding-binding immunoassays

Course Description

1- Course Name: Curricula and textbooks					
2- Course Code: :					
3- Semester / Year:2024-2025					
4- Date this description was prepared: 13/2/2024					
5- Available attendance forms:my presence					
6- Number of study hours (total)\number of units (total):30 o'clock					
7- Name of the official judge (if more than one name is prohibited) Walid Ahmed Abd					
8- Course objectives:					
Objectives of the study subject:		Understanding the concept of curriculum Comparing the old and modern curriculum • Curricula and their development			
9. Teaching and learning strategies		Learning to Mastery Strategy Problem–Solving Method Inductive Method			
The strategy		Cognitive objectives: Understanding thinking, its types and theories. Skill objectives: Thinking skills. Affective objectives: Developing the student's ability to work and think logically. Encouraging the student to take turns in lessons.			
10- Course structure					
Week	Hours	Required	Name of the unit or	Learning	Evaluation

		learning outcomes	topic	method	method
The First	2	In the ninth paragraph	The concept of curriculum	Theoretical	Theoretical question and discussion
The Second	2	In the ninth paragraph	The old concept of method and the modern concept	Theoretical	Theoretical question and discussion
The Third	2	-	Comparison between the modern and ancient concept of the curriculum	Theoretical	Theoretical question and discussion
The fourth	2	In the ninth paragraph	Curriculum elements	Theoretical	Theoretical question and discussion
The fifth	2		Curriculum development in secondary education	Theoretical	Theoretical question and discussion
The sixth	2	In the ninth paragraph	Curriculum construction and development	Theoretical	Theoretical question and discussion
The seventh	2		Curriculum evaluation	Theoretical	Theoretical question and discussion
The eighth	2	In the ninth paragraph	a test	Theoretical	Theoretical question and discussion
The ninth	2	In the ninth paragraph	Curriculum evaluation forms	Theoretical	Theoretical question and discussion
The tenth	2	In the ninth paragraph	Curriculum evaluation	Theoretical	Theoretical question and discussion
The eleven	2	In the ninth paragraph	What is meant by curriculum evaluation?	Theoretical	Theoretical question and discussion
The twelve	2	In the ninth paragraph	The teacher and the curriculum	Theoretical	Theoretical question and discussion
The thirteen	2	In the ninth paragraph	Test	Theoretical	Theoretical question and discussion
The fourteen	2	In the ninth paragraph	Textbook analysis	Theoretical	Theoretical question and discussion
The fifteen	2	In the ninth paragraph		Theoretical	Theoretical question and discussion

Course Description
